

SecureYAC

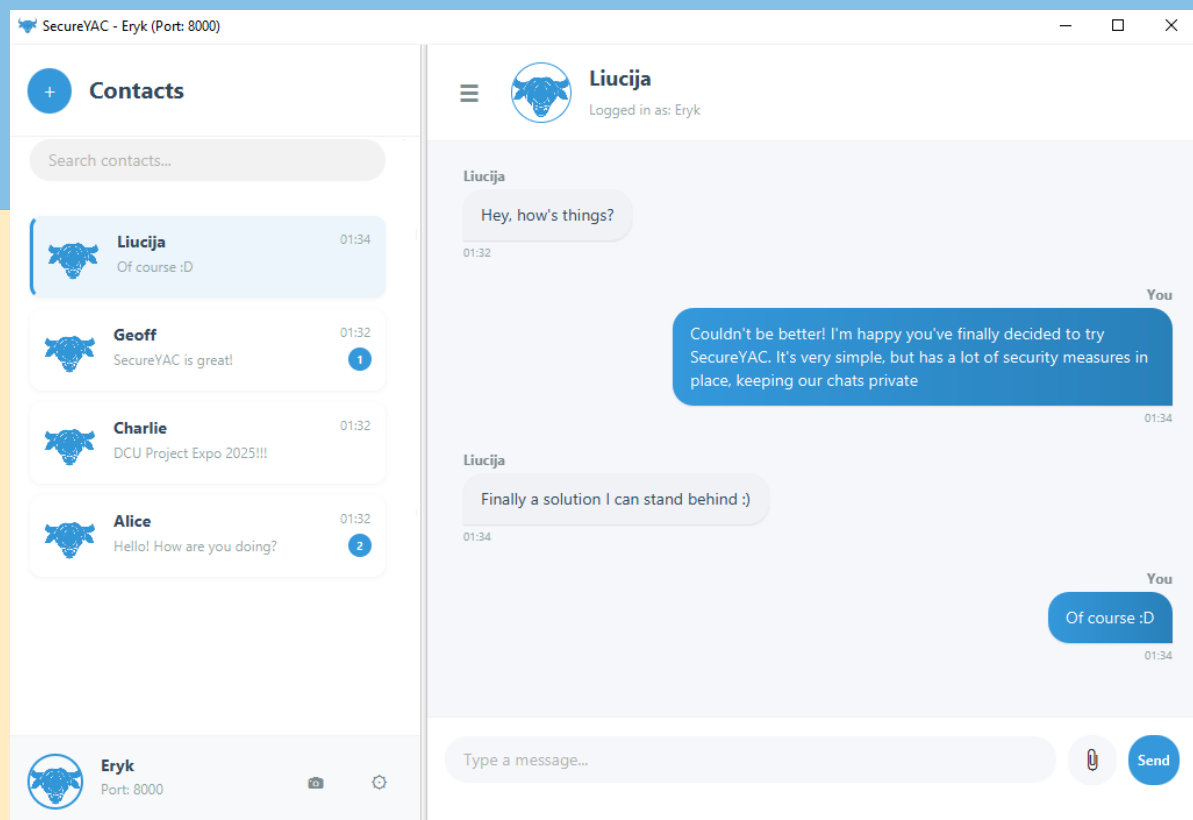

Your Chats - Your Rules

SecureYAC is a privacy-first messaging application designed for users who value security and simplicity. With modern encryption and a sleek, minimalistic interface, SecureYAC guarantees your conversations stay truly private - without compromise.

Key features:

- **End-to-End Encryption** using Signal's X3DH and Double Ratchet Protocols.
- **Peer-to-Peer Network Protocol** for direct, server-less communication.
- **Key Bundle Exchange** to prevent unwanted or unsolicited messages.
- **Minimalistic UI** that guarantees easy and smooth user experience.

Developed Using:

Bouncy Castle
with Keyfactor

Java™

Signal

JUnit

Gradle
